

***Fairfax County Neighborhood Enhancement Grant***  
***GLENCANNON COMMUNITY PARK***  
***WET LAND GRANT PROJECT***

**PLEASE COME AND JOIN US ON**

**When:** **October 13 at 8am** until we run out of things to plant...and if we need, plan to finish the project on October 27<sup>th</sup>.

**What:** We have around 45 trees and 50 bushes to put in along the Creek Bed to provide a riparian buffer to protect the creek from erosion and subsequently the watershed. This is in keeping with the plans we have been provided by the Fairfax County Watershed Division and the Virginia State Department of Forestry.

This project has been in the plans for a few years and now is the time to watch it all come together!

**What to Bring:**

- Wheel barrels
- Shovels
- Hoes
- Rakes
- Any gas power tools
- Your willingness to contribute to the community and help make this project a success

**Suggestions:** We suggest you wear long pants and long sleeve shirts, gloves, hats and boots. We will be working along the edge of the creek planting the trees and shrubs. We will provide a deep wood bug spray.

**Volunteer / Community Service Hours Awarded Opportunity:**

- High School students, boy scouts, girl scouts and other individuals who need community service hours can get credit for working on this project. (This was confirmed by Fairfax County who has done this in the past.) You can get your volunteer service hours by contributing your time on this community project.
- Please contact us if you are interested.
